How to use analytics

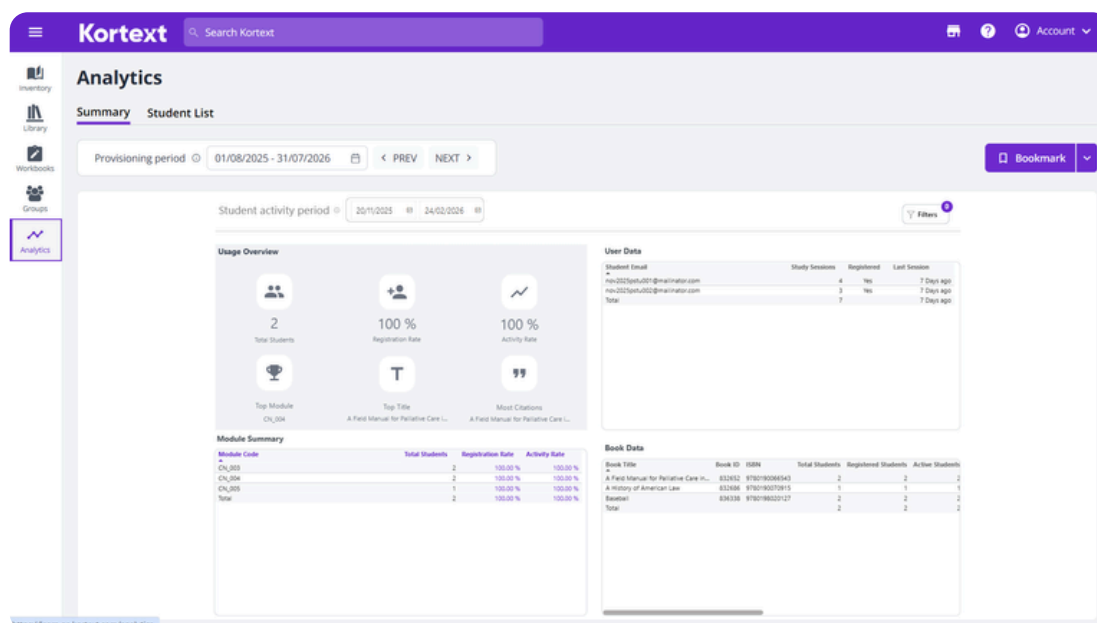

Navigating to the dashboard

Log in to your account at <https://app.kortext.com/login> and select Analytics from the vertical navigation bar. This will take you to your institution's analytics dashboard.

Dashboard sections

The Lecturer Analytics dashboard has four main sections. The first section provides links to the different analytics areas, the second displays the period of time being analysed, the third contains the Bookmarks panel, and the final section presents the analytics data.

Provisioning period

This date filter determines the discrete time interval the user wants to see Analytics for. Default is set to 12 months starting 1 August.

- The Provisioning period is flexible and can be adjusted to any date from the present to the past.
- Prev and Next buttons will change the Provisioning Period to the immediate past or future date period that is of the same length as the current Provisioning Period set by the user.

Bookmarks

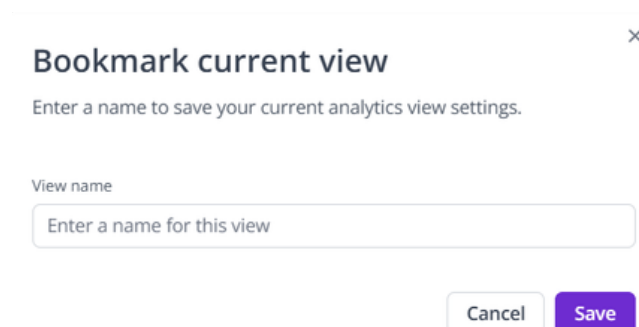

Bookmarks allow the user to capture the current configured view of an Analytics Reports, including filtering and the state of the visuals, for future reference and collaborative sharing.

Bookmarks are stored in the Bookmarks section on the right side of a report, which can be expanded and collapsed by clicking on the arrow.

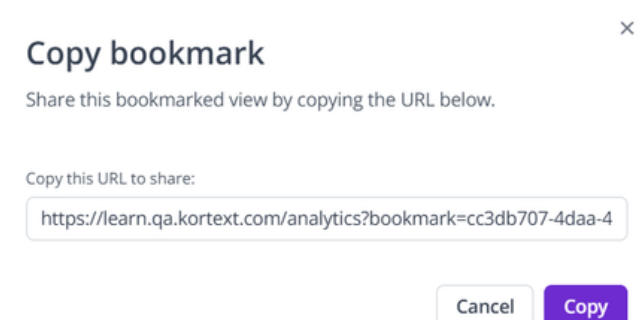

Creating a bookmark

Create a bookmark using the Create Bookmark button, bookmarks are stored in the Bookmarks section on the right side of a report, which can be expanded and collapsed by clicking on the arrow.

Sharing a bookmark

Existing bookmarks can be shared by clicking the URL icon next to a bookmark. This opens the copy-bookmark modal, where you can copy the URL by selecting the Copy button. The copied link can then be shared with any user who has access to the Admin Analytics dashboards.

Deleting a bookmark

To delete an existing bookmark, simply click on the Wastebasket icon next to an existing bookmark, and select delete to confirm.

Student activity period

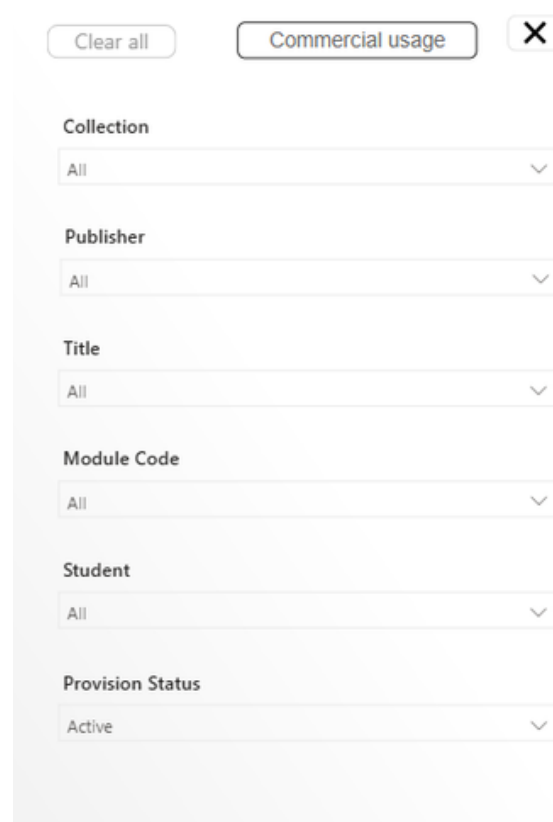

This filter shows you the period when students actively accessed or used their books. Select a start and end date to narrow the data to the student usage window you want to analyse.

Filters

The filters panel contains and manages filter for the user to segment and filter the analytics.

- Over 6 separate filters contained in a collapsable panel. Filters affect all pages on the report.
- Users can select one or any number of filters to segment the reports. Filters can be individually expanded and collapsed. Options dynamically adjust based on your selections, showing only relevant and available data.
- A single selection can be chosen per section of the filters. The Filters icon will display the number of active filters currently set. Remove filters by clicking 'Clear Selections' and clicking 'Clear all' will remove every filter and reset the analytics.

Commercial usage

Selecting this filter displays usage data exclusively for paid commercial content, excluding all usage of the Kortext OER collection.

Summary report

The Summary report provides an overview of student activity, including overall engagement rates and the top-used titles within the provision. For teach customers with IQ enabled, additional functionality offers deeper insight into student behaviour, including granular detail showing which students are engaging with specific books and the modules they belong to.

Student list

Student List is available exclusively to teach customers with IQ enabled. It provides a detailed report of every student in a lecturer’s class, including the modules they are enrolled in, the title assigned to them, and insights into how much time they’ve spent engaging with that title.

Data definitions

Below you'll find definitions and explanations for each data point, measure and computation used in the Kortext lecturer dashboard.

Summary dashboard

- **Total students:** The total number of students enrolled that have been assigned to modules associated with the lecturer during the provision period.
- **Top module:** The module with the most student engagement as measured by study time.
- **Registration rate:** The percentage of total students who have registered on Kortext, calculated as registered students / total students.
- **Top title:** The title of the book with the most student engagement as measured by study time.
- **Activity rate:** The percentage of registered students who have been active on the Kortext Platform, calculated as Active students / Registered students.
- **Active students (not directly displayed in the dashboard):** The total number of enrolled students, total students, that have accessed content on by either reading a page or downloading content.
- **Study time (not directly displayed in the dashboard):** The total time spent by active students engaging with books on Kortext.
- **Registered students (not directly displayed in the dashboard):** The total number of enrolled students, total students, that have accepted the terms and conditions of Kortext.

STUDENT SUMMARY DATA TABLE DEFINITIONS

- **Student:** The students email address
- **Study sessions:** The total number of study sessions for the student during the provision period.
- **Registered:** Has the student registered on Kortext by accepting the terms and conditions, true or false.
- **Last session:** The last date that the student was active on Kortext.
- **Book:** The title of book allocated against student/s.
- **Study time:** The total time spent studying for the book on Kortext.
- **Pages accessed:** The total number of pages accessed, and pages printed for the book on Kortext.
- **Annotations:** The total number of highlights, notes and bookmarks made.
- **Searches:** The total number of searches made for the title.
- **Citations:** The total number of citations for a book on Kortext.
- **Prints & copies:** The total number of prints & copies of a book.
- **Downloads:** The total number of times the Book has been downloaded to a Kortext app for offline use.

MODULE SUMMARY DEFINITIONS

- **Module code:** The module code to which users have been allocated.
- **Title:** The book title associated with the module to which users have been allocated.
- **Total student:** Refer to summary dashboard definitions.
- **Registration Rate:** Refer to summary dashboard definitions.
- **Activity Rate:** Refer to summary dashboard definitions.

Filter definitions

- **Title:** The title of the selected book.
- **Collection:** A curated group of books available to students.
- **Publisher:** The publisher/s of the selected book.
- **Student:** The email ID of the student.
- **Module code:** A specific section or unit within a course.
- **Provision status:** The current status of the user's access to the resource.
- **Commercial usage:** A button which excludes Kortext OER collection data.
- **Clear all:** A button that, when clicked, removes all currently applied filters on the dashboard.
- **Bookmark:** A button that allows the user to name and save a snapshot of the current dashboard view for future reference.
- **Saved bookmarks:** A saved snapshot of the dashboard that includes the current view and applied filters for bookmarking purposes.

Data slicers

- **Student activity period:** Dates when students accessed or used the books.
- **Provisioning period:** Dates when books were provisioned or made available.
- **Active filters count:** The filters currently active or applied on the dashboard, affecting the displayed data.
